

SECURITY CONFIDENCE

DATA GUARDIAN BACKUP PREMIER EDITION

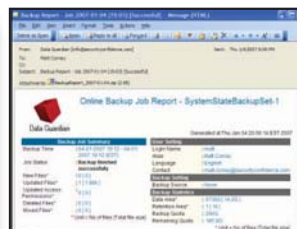

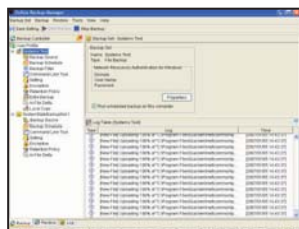

Security Confidence's Data Guardian Backup enables your business to enjoy the peace of mind that results from knowing that your critical data is safe and available whenever it is needed.

Security Confidence offers backup solutions for organizations with as little as a few megabytes of data to as much as terabytes, all monitored and managed by the Security Confidence Network Operations Center. Reports, alerts, and secured web based restoration of your data are accessible through the Guardian Security Portal.

Security Confidence's Data Guardian Backup Premier Edition stores your organization's backups on a secure storage farm located in Cincinnati, Ohio. The storage farm consists of load-balanced servers, high speed SANs, with full replication to secondary redundant systems, and storage arrays configured with RAID 5/1 redundancy and parity.

DATA GUARDIAN BACKUP PREMIER EDITION KEY BENEFITS:

- Instant Availability of Service - ASP hosted program
- 128 bit encryption of all data before it leaves your network
- Email notification of missed or failed backups
- Automatically sends a copy of your data to a high-tech data center every night or multiple times daily
- Open file backup - allowing for active database files or files in use to be backed up
- Centralized reporting, monitoring, and alerts of backup and restoration status
- All maintenance, upgrades, and support included
- Provides HIPAA, GLBA, and other regulatory compliance
- Provides peace of mind and data security in event of disaster
- Advanced RESTORE/SEED allows Security Confidence to transport encrypted data via removable disk for on site backups or restores
- Direct support of: Microsoft Exchange Server, Microsoft Exchange Mailboxes/Mail, Microsoft SQL Server, MySQL Database Server, Lotus Domino, Oracle Database Server, Microsoft Volume Shadow Copy, and In-File Delta

FEATURES:

- Affordable and reliable Online Data Backup solution
- Fully managed and monitored by the *Security Confidence NOC - Network Operations Center*
- Data stored in a compressed and encrypted state within a secure storage facility
- Data fully replicated to secondary systems and data center
- Protects against accidental data deletion, hard drive crashes, theft, fire, and/or tape backup failures
- Open-file backup capabilities to backup applications operating at time of backup
- Flexible scheduling options
- Automatic application and service upgrades
- All support services included
- Customized features and data retention schedules
- Daily email reports provide detailed backup summary
- Customized alerts provide notification of backup failure or file deletion
- In compliance with HIPAA, GLBA, and Sarbanes Oxley standards
- Incremental, compressed, and In-File Delta backups that greatly reduce network bandwidth by transferring only portions of file that have been modified/changed

WHY USE DATA GUARDIAN ONLINE DATA BACKUP?

BECAUSE WE PROVIDE
THE MOST SECURE,
RELIABLE AND
COST-EFFECTIVE MEANS
OF PROTECTING YOUR
MOST IMPORTANT,
NON-REPLACEABLE
ASSET - YOUR DATA.

SAVE MONEY

- **No More Labor** - Data Guardian is a completely automated off site backup system. Once you select your data and program the scheduler, backups occur automatically.
- **No More Hardware** - Data Guardian does not require you to purchase any more hardware now or in the future. As your business grows, you can add as much storage as you will ever need.
- **No More Tapes or Disks** - Say goodbye to sensitive backup tapes and disks. Data Guardian stores your data on redundant servers for easy and secure backup and recovery.
- **No More Lost Productivity** - Don't waste another minute performing backups. Data Guardian allows you to set your backup schedule and concentrate on your business, freeing up valuable time for you and your employees.

IMPROVE SECURITY

- **Real Off Site Data Storage** - Data Guardian is the only way to get copies of your data away from your office, or home, and into a facility designed for the secure storage of business data. By making this process automatic you ensure that backups occur everyday.
- **Multiple Levels of Encryption** - Data Guardian uses 128 BIT encryption to protect your data before it leaves your computer or network. While in storage, your data is always left in encrypted format.
- **World Class Data Centers** - Your data is stored in secured data centers that include features like biometric security, armed guards, redundant power supplies, and climate control.

INCREASE FLEXIBILITY

- **Fast Data Restoration** - Need the right file, right now? Data Guardian allows you to select any specific file or folder and restore it instantly over the Internet. No more hunting through tapes or disks. No more looking for that one file on a massive tape. Just select your file and restore it!
- **Easy Disaster Recovery** - If you ever need a full backup delivered to you in the event of a disaster, we will Fed Ex your data to you on encrypted media.
- **Multiple Users and/or Locations** - Data Guardian can allow you to implement a standard solution that will protect all of your business data no matter where your offices or employees are.
- **Advanced Data Retention** - Data Guardian allows you to keep current daily, monthly, quarterly, and yearly backups of your important data.

MULTI PLATFORM & APPLICATION SUPPORT

- Supports all common operating systems including: Windows, Linux, Mac OS, and Solaris.
- Advanced active application support including hot backup of: Microsoft Exchange Server, Microsoft Exchange Individual Mail (Mail Level Backup), Microsoft SQL Server, MySQL Database Server, Lotus Domino, & Oracle Database Server.
- Advanced open file support utilizing Microsoft Volume Shadow Copy.
- Advanced In-File Delta allowing only changed parts of files to be backed up.
